LAB 8 REPORT

PREPARED FOR:

DR. RABIEI BIN MAMAT

PREPARED BY:

MOHAMAD HAZIM BIN MOHD SHAKRI (S61770)

Question Native (Lab 8) :

Create a simple login with embedded username and password inside app.
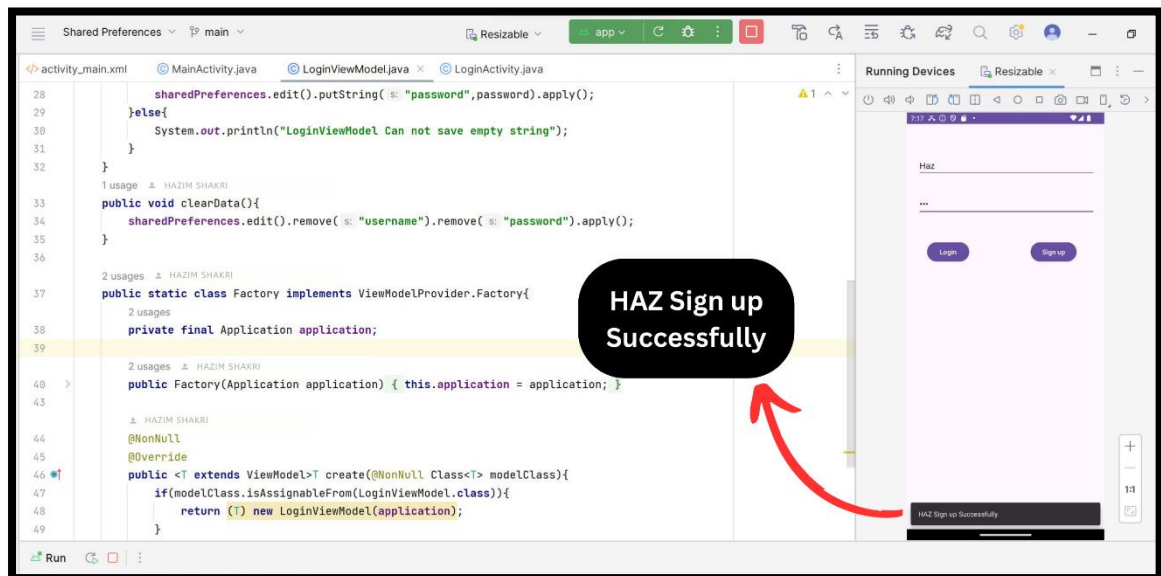

1. Store username and password in Shared Preferences

2. When the app first open check the content of shared preferences. If empty, open the login page. If not empty, open success page.
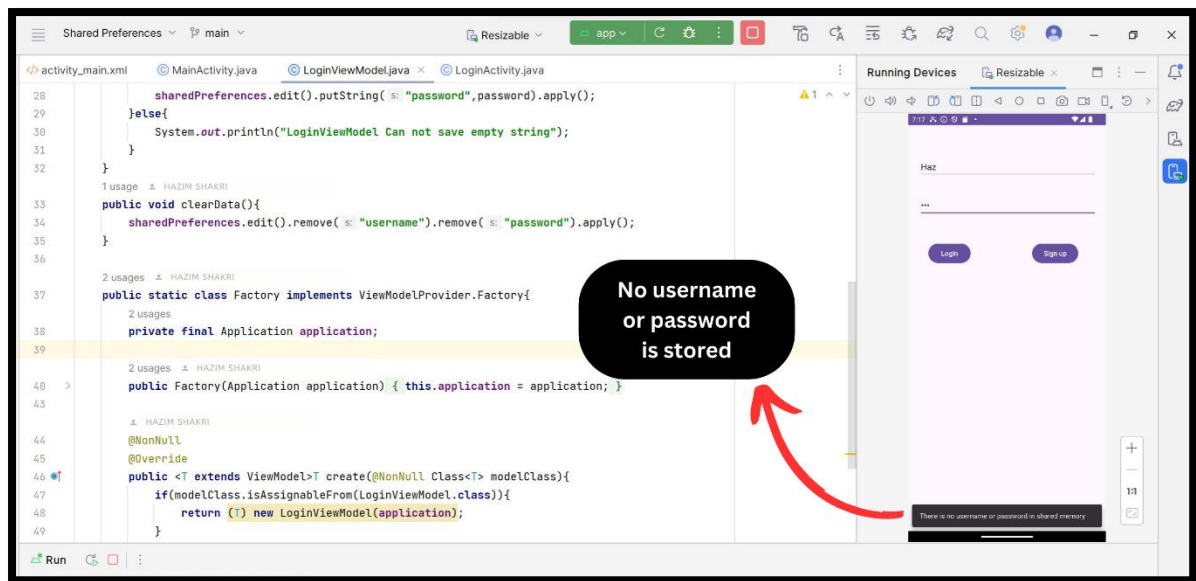

Coding and Explanation:

Creating a page with Enter Username and Enter Password textfield.

Creating a Login and SignUp elevatedbutton.

If data is stored, a message will display as 'Sign up successfully'.

If data is not stored, the message will display 'No username or password is stored'.

Next page after clicking the 'Login' button.
